codeboy's rant

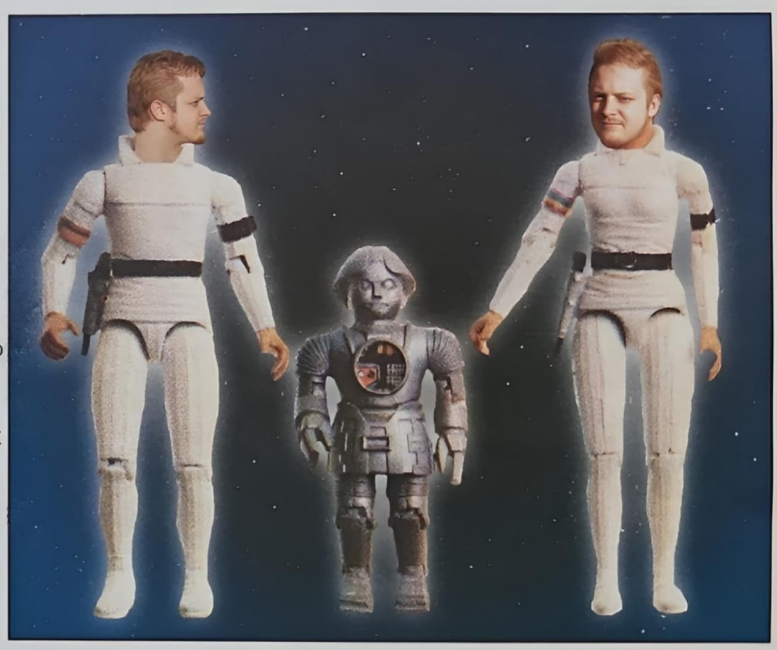
Over the past month or so I've had the joyous task of finding a new hacker and game reviewer, and I have come to realize just how stupid this industry is in its current state. Be it the pompous fools like myself, or just the fools who take it all too seriously, nothing seems to work out.

Man, what a drag it would be to play games, hack a few codes and write a review. Man, it would suck to make at least a halfway decent paycheck doing what you like. I think it's a dream job, fairly easy to fill any void in our staff. Instead I get people that want to be treated like kings yet don't believe in Spell-Check. What am I doing wrong here?

It seems that the serious writers don't want to even touch the industry, it's not really writing I guess. Really, it's not that bad of a job. I went from skateboarding to working at a comic shop four years ago to selecting which motorcycle to ride to the office (though inevitably it's the Shadow, Brit bikes tend not to want to work, ever).

Yeah, selling out and working for "the Man" is a real travesty I tell ya. What the Hell happened to just enjoying yourself folks? Life ain't so damn serious, and you're really not that impressive, so relax. Something that was primarily done for fun has taken on such a serious tone in the past decade, and it's getting rather annoying.

I don't know how many Account Managers or Sales Support members we've hired on in the past few months. They seem to have their senses, and I imagine they would have to for those positions. All I want is someone who enjoys games, knows some math and can write in some fashion. You don't even have to be nice. But all I get are morons with Internet handles instead of Christian names wanting to be pampered more than Elvis himself. When did gamers become so serious about themselves?



DANG WILMA, HAS BUCK BEEN WAILIN' ON YA WITH THE UGLY STICK AGAIN?

I'm sorry all you have is some dumbass message board to interact on but here's a chance to have a job. All you gotta do is have the initiative to take it, and not be so caught up in yourself that you completely shun the real world. Games should mean fun; that was the original point. What better of an industry to get involved in if given the chance? You're not gonna make a million, but you should have quite a bit of fun. Let's face it, you weren't gonna make a million anyway, so why not have some fun in your career, eh? This isn't EGM, PSM or even Tips & Tricks, but it is a blast. Take a look in the mirror, you're not that serious.

editor's note

Hide-ee ho neighbors! Obviously the post office hasn't been affected by the Y2K/Milloonnium craze because you're reading this. I say "Milloonnium" because of the lack of chaos and destruction that was originally expected. Somehow all of these Y2K "problems" mysteriously dissipated each day the New Year got closer, didn't they? You know... I feel somehow ripped off! After all the hype was built up, after all the commercials we were subjected to. All of it a bunch of malarkey! Not that I'm promoting chaos or anything like that, but it's kinda disappointing to have it end so smoothly. I think the worst thing that happened was Uncle Ed's Miracle Ear had run out of power or was it my mother's dog ruining the carpet... twice!

I even thought about faking a power failure just to appease my own chaotic desires. I planned the whole thing out... I would sneak into the garage, where the circuit breaker is located, about five minutes before twelve. Using mini walkie-talkies to communicate with my sidekick who, at the time, was inside with the rest of the party helping me synchronize it perfectly. "3 - 2 - 1..." darkness, followed by a woman screaming and/or people pushing and shoving to escape only to find me in the garage laughing my... I think you can see where I'm going with this. Fortunately for the unaware partygoers, I had consumed enough alcohol to tranquilize a rhino and was unable to move... let alone attempt such a dastardly deed! I can vaguely remember picking up the phone after midnight thinking, "... communication will be the first to go!" Nope, everything worked fine. The lights didn't flicker, the TV didn't blink and my PC still doesn't do what I want it to!

Normally, I wouldn't vent on you kind caring folks like this, but I feel as though we've all been done a huge injustice here! I know some of you out there in GameShark Land feel as I do. You wanted rioting in the streets, power outages and total Rodney King-style mayhem. The Y2K "thing" was a lie, unless you bought into it. To quote a great lyric from a great song, "Who controls the past now, controls the future... who controls the present now, controls the past!" Zach De La Rocha, lead singer, Rage Against the Machine. Don't believe everything you hear and/or read kids. Take from it what you can and learn!

Now that I am all worked up, let's talk business. As you may have noticed, something new and/or improved has been added to Dangerous Waters with each new issue. Well this one is no different! I think you'll be pleasantly surprised to find GameBoy GameShark codes, something never found in Dangerous Waters before. We'll also continue to add more Strategies and Tips as the issues get larger, so be ready! Our Dangerous Designs Art Contest has received more entries than ever before, keep up the great work! I barely have room to store all the entries, let alone judge them for quality! Check out this issue's winners, now there's some talent.

And one last thing...
ABUSE THE FRICKIN' POWER, ALREADY!

Dan Ullmann III

Mailbox

The Voice of GameShark Fans.

I like to think that I can help everyone... okay, well, maybe not everyone (certain people are beyond help)! Here's my sorry attempt at being the "All Knowing Help Guy" or "guru" if you will. Ask me anything, go head, I dare ya! I can't guarantee the validity of the answers within, but I can guarantee you'll get an answer!

Hey,

I'm fustrated. Thank you for replying bla bla bla I thought S-wire came out in September, but my local EB just got them last week. There should be more people in the discussion groups by now. I'll start conversation in most. How can I post memory card saves? It shows the screen on the box, but I can't figure out how to post them. There aren't any strategies or game stuff on the site, mostly just reviews. Aren't you in charge of that? Why not many updates? I had more to say, but I don't want to type it all again. Please reply and answer my questions. I attached a game Vigilante 8 game save but it says "Eigilante8" I thought it was wierd so I sent it.

Darklink@sharkwire.com

Hey yourself, Darklink,

You must be the first person to own a SharkWire! I think we have roughly 80-100 SharkWire users so far (as of 12/31/99). Please hang in there, more users are joining the fun everyday. I'm working on getting more people into the discussion groups as we speak. I think you'll notice a difference before the end of the week.

As for the content, you've probably noticed we've got content suppliers or partners. Each one of these partners has sent us an archive of news articles, reviews, previews, news and more. It's proven to be quite labor-intensive process getting these into the SW environment, but it's all-good now. There are quite a few quides and other helpful tools inside SW already. Just break out the bloodhounds and see what you can come up with. New strategy guides are being added nearly every day. We're working to update the site 24-7, keep your eyes peeled!

Thanks Darklink.

My GameShark Pro always seems to freeze up on such games as ff7 and ff8 and its starting to do this on other games. It seems that when I get to the "new game or continue" screen it won't work—I chose continue (I do have a game saved with GameShark codes activated) and it says that it can't read the memory card but without the shark it works fine. When I choose the new game it starts and works for about five seconds and then the screen freezes as the music plays on. I'm baffled if there is any way this can be fixed please help I would hate to have to go out and spend another fifty bucks if I don't have to.

Thanks for anything you can do.

Sincerely,
Totally Confused

Dear T.C.,

Here's what you should do:

If you can still access the codes, try to erase any codes you have entered for those games. Once they are removed from the system, enter just one of those codes again. Then, turn the game on and test it during gameplay. If it works, leave it in the system...if not remove it immediately (invalid codes can cause the shark to lock-up).

Otherwise contact customer service (410-785-4064), they will surely help you.

Hope it works!

Hey Dan, can you give me the scoop on GameShark for Dreamcast? When's it going to be released? Is it going to be regular or pro? Also, when's the next issue of Dangerous Waters going to be sent?

Hi,

The DC GameShark is going to be released, cross your fingers, the week of April 1, 2000 (don't quote me on that). It will be Pro-'ish", however, I am sure InterAct has a few new things up their sleeves for this installment!

Issue #24 of Dangerous Waters will be shipping in April 2000! I can not give you any insider information, for I don't have any. But I can give you the recipe for one serving of scrambled eggs:

2-3 eggs (depending on how hungry you are)
A splash of milk (whichever grade you prefer)

Open eggs into a mixing bowl and thoroughly scramble eggs. Add splash of milk to scrambled eggs and continue scrambling until thoroughly mixed. Once the eggs are mixed turn on stove and heat frying pan until medium/medium-high temperature is met. After the pan has reached the desired temperature, pour fully scrambled egg mixture into heated frying pan and stir with a spatula or other cooking utensil. As the eggs solidify you may want to chop them up with the cooking utensil...scramble them if you will! Heat eggs until golden (roughly 3-4 minutes, maybe more depending on the power of your stove). Now you are ready to serve and enjoy!

Let me know if you need anything else.

Thanks,
-Dan Ullmann

Dangerous Designs

No you're not looking at the latest art gallery submissions, it's this issue's winners and runners-up! Although, I'm sure any art gallery would be proud to display such fine works of art! This issue Andrew Robb from Nepean, Ontario, Canada has taken the DexDrive prize, congratulations! Okay, okay, I'll shutup now...

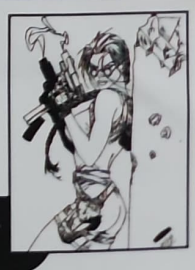
This issue's winner:

Andrew Robb
Nepean, Ontario, Canada

I'll get your N64 DexDrive out to you immediately, Andrew. Meanwhile, take time to look at this issue's runners-up.

Runners-up:

Kris Sallee
Martin, TN



Jake McAdams
Kilgore, TX

Kris Sallee, age 16, and Jake McAdams are our runners-up for this issue. They'll be receiving a GameShark T-shirt. Thanks to all who've entered... keep 'em coming. You're more than welcome to send in multiple submissions, so draw your pretty little hearts out! Our offer for a N64 or PSX DexDrive still stands for issue 24. So get to work, send your artwork in to us today!

OKAY, CONTINUE ABUSING THE POWER!

Review These

An unbiased look at what's hot and what's not.

Title: South Park: Chef's Luv Shack
System: DC
Developer: Acclaim Studios
Publisher: Acclaim
Format: CD
# of Players: 4
ESRB Rating: Mature

By Dullman

It's not hard to see where South Park's sophomoric charm comes from. After all four crude, foul-mouthed kids placed in a variety of adult situations that require them to mouth off in incredibly distasteful ways is funny no matter which way you look at it. Whatever.

South Park: Chef's Luv Shack is a cross between Mario Party, You Don't Know Jack, and Hustler magazine. You answer some fairly offensive questions in a one, two, three, or four-player match. Between question rounds there are South Park mini-games like a lightning round involving Cartman and an anal probe, spanking a monkey's ass, and more. It's just another day in South Park. The graphics remain the same for every single version (PlayStation, Nintendo 64, and Dreamcast), and remain extremely faithful to the TV show. It's wasted on the Dreamcast version, which has the graphic power to rival the Sistine Chapel, but instead showcases flat, poorly drawn 2D graphics. Rendered 3D models would have worked well on the DC version.

The sound is almost the same across the platforms, which means you'll hear lots of Chef, some of the kids' sound bites, and wacky game show music. It all becomes very repetitive, very, very quickly. There was room for far more (and far funnier) sound bites, but somewhere someone dropped the ball. The control is a little more slippery than it has to be. Across the platforms the control requires a few simple button presses, but the mini-games need some serious thrashing to complete them. A more serious problem lies in the disc loading times, which are extremely long (and kills the fun) on the Dreamcast. South Park: Chef's Luv Shack will remain one of those few games that fans enjoy and deserve, and everyone else should avoid. There's nothing to Luv here.

Overall:	6.5

Title: Metal Gear VR Missions
System: PSX
Developer: Konami
Publisher: Konami
Format: CD
# of Players: 1
ESRB Rating: Mature

By Erika Crouse

The Skinny:

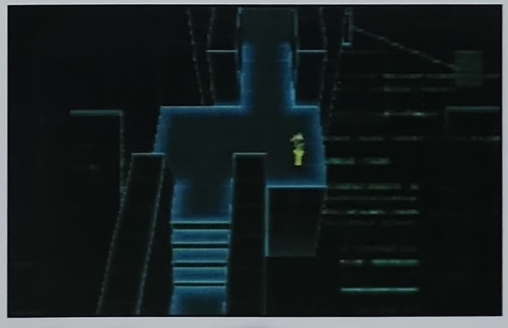
Puzzle solving with a large weapon is always fun. In Metal Gear Solid VR missions, you get to do just that. An equal emphasis is placed on moving around undetected and on one's skills with weapons. The control, while not intuitive, is precise once you get used to it, and visually the game is pretty nifty.

Overall:	8
Graphics:	9
Sound:	8
Control:	7
Fresh Factor:	8
Gamelife:	8

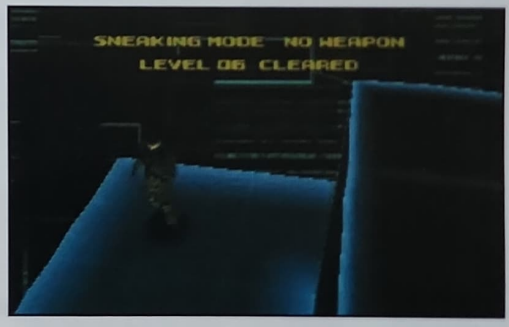
by Dullmann

The Skinny:

I loved Metal Gear Solid! It was everything I ever wanted in a videogame. Stealth, great sound, intuitiveness and control made MGS revolutionary. Now Konami has released a supplement, if you will, to this marvel of marvels. MGS VR Missions is a compilation of new Training Missions as seen in the original MGS and there is tons of em! Now don't think, "...well, how much fun can it be if the missions are similar to the original training missions?" A few may be similar, but most are not for the faint at heart! You button mashers out there need to learn the ways of the new school baby! I'd say, the first five - six missions could be considered easy to moderately difficult. Oh and by the way, if you're good enough you may even be able to play as the ninja, but I don't want to ruin it for everyone... oops, sorry.:)



Control is as good if not better than the original. I don't know why but the control seems to be a tad tighter than in the original. Sound is there...you can hear stuff. The graphics are nicely done, as in the original, but if you have an older TV it could be a little dark (I'm talkin' Zenith old).



Overall, I feel this is a great addition to the hardcore gamer's library. If you loved MGS then you'll love this title. Although, I'd recommend renting it for those who've yet to embrace the chewy, sweet goodness of the original MGS.

An unbiased look at what's hot and what's not.

Title: Roadsters
System: N64
Developer: Titus Software
Publisher: Titus Software
# of Players: 4
ESRB Rating: Everyone

by Bill

The Skinny:

Another racing game for the N64, what a surprise. Roadsters reminds me slightly of the four billion incarnations of Cruis'n USA, only slightly better. The graphics are okay, nothing distracting during the races. Oh, but some of those characters in this game are oddly androgynous, in an Amazonian kinda way almost worthy of a Seinfeld episode. Enough of that, the graphics are average. The sound is there. It has controls. It's a racing title of the average sort for the N64, and that just about covers it. If you care enough there are different skill levels to race on and tons of almost real cars to upgrade. I'd like to go on in this review but I'm tired of the same old boring racing game on this system. These are not the cars you're looking for...carry on.

Overall:	5.2
Graphics:	6
Sound:	6
Control:	6
Fresh Factor:	2
Gamelife:	6

by Gandor

The Skinny:

Driving games are boring garbage unless they have some kind of shtick to 'em. Roadsters has no shtick to speak of, so therefore it is worthless garbage. Drive fast and beat the other cars to the finish line, that's what this game is all about. Where it fails is that it offers no weapons to destroy the other cars with, no crazy shortcuts to find, and no cute mascots driving the cars. Just plain old pedal-to-the-metal, tap the brakes occasionally driving. No thanks; I get enough of that kind of driving from my daily commute.

Overall:	4.8
Graphics:	6
Sound:	5
Control:	5

Gamelife:	5

Title: Bionic Commando
Genre: Action
System: Game Boy Color
Developer: Capcom
Publisher: Capcom

by Timmy

The Skinny:

When I think back to my NES days, the game I remember playing the most is Bionic Commando. Now, it's on my desk in a wonderful Game Boy Color version.

This time around, you have a choice between a female or male character. The female is considerably faster, but the male can take more hits. I chose the male for my adventure. Next time through, I think I'll escort the lady through a fine day of swinging and shooting.

Your main goal is to stop a bunch of bad guys who have a super-weapon called the Albatross. You have a gun (upgraded as you progress) and a long mechanical arm with a claw on the end. You use the claw to swing from platform to platform, climb up to a higher platform, catch supplies and stun enemies. The action is of your basic hop along platforms and kill bad guys until you reach the level boss variety, but is very fun and addictive – Just as the original was.

The graphics are your standard Game Boy Color Graphics and you get the standard Game Boy quality music and sound. The control is on point and responsive. The freshness is a bit stale, since this game was out quite a few years ago, but it's still damn fun today! The use of the claw arm to maneuver is a refreshing change from the standard jump. And I'd say that once you pick Bionic Commando up, you'll be playing it for some time.

You have my firm recommendation to go out and buy this game. Nostalgic and first time players will equally love it.

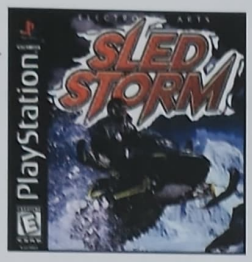
You'll Like This Game if You Liked the original Bionic Commando and side scrolling platformers.

Overall:	8.2
Graphics:	8
Sound:	7
Control:	9
Fresh Factor:	8
Gamelife:	9

GameTips & Tricks

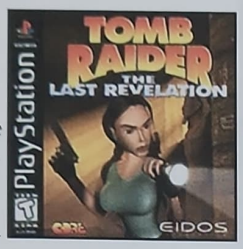
Conquer worlds. Regain strength. Subdue the enemy.

Sled Storm



Play as Jackal: Enter the options screen, select the load/save option and display the password screen. Then, enter L2, L2, Circle, R2, Square, R1, L1 and Triangle as a password

Tomb Raider: The Last Revelation

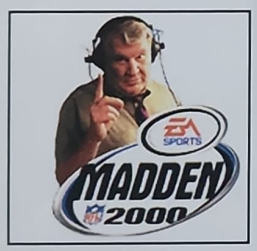


All Level Items: While in the game, face DIRECTLY NORTH. (This is a little difficult but you have to be facing EXACTLY NORTH!) (Red part of compass points north.) Go into your inventory and notice that the compass is almost transparent.Now highlight the "LARGE MEDIPACK". Press "L1, L2, R1, R2 and DOWN" simultaneously. Exit the inventory and then re-enter. You should now have "ALL ITEMS" for the level you are on.

Croc 2:

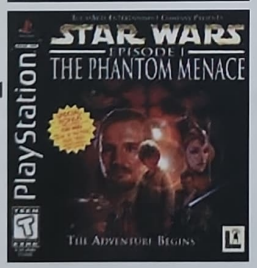
Infinite Lives: From the title screen, hold L1 and press Circle, Down, Left, Up, Right, Triangle, Down.

Madden 2000



Bonus Stadiums: Enter this code at the code entry screen, MULENIUM

Star Wars: TPM



Cheat Mode: Hold L1 + Select and press Triangle from the title screen. After choosing your options press Triangle to exit and start a game.

Um Jammer Lammy

Bonus Parrappa Levels: Go to the level selection screen after finishing the game. Press right until you see the Parappa levels.

Armorines: Project S.W.A.R.M.

Run Faster: Pause the game. Select "Cheats" at the pause menu. Then enter "SONIC" as a code to run nearly twice as fast.

Goemon's Great Adventure

Extra Costumes: Activate four player mode and then go to the Prediction house to receive access to other costumes.

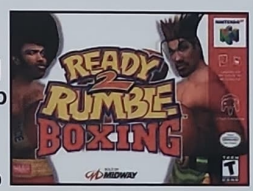
Supercross 2000

Unlock all Bikes and Tracks: Go to the cheat menu enter the code "ALLBIKES".

Winback

Trial Mode: At the main menu, press Up, Down(2), Right(3), Left(4), C-Down + Start to unlock trial mode. This mode allows any level in the game to be played.

Ready 2 Rumble Boxing

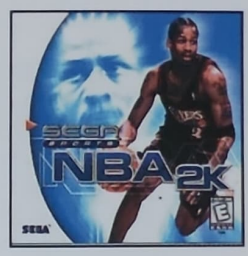


Unlock Championship Boxers: Enter "CHAMP" as a Gym name in Championship mode. Exit Championship mode and enter Arcade mode to unlock Damien Black. (Cheat also unlocks Kemo Claw, Bruce Blade and Nat Daddy.)

Duke Nukem Zero Hour

All Guns and Infinite Ammo: At the main menu press A, B, A, C-Up, C-Down, L, A.

NBA 2K



Fat Players: Under the options screen go to codes and enter, LARD.

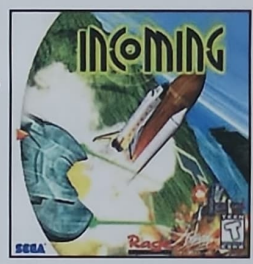
Toy Commander

All Rooms Available: Pause the game, then hold L and press A, Y, X, B, Y, X. If you entered the code correctly, you will hear a tone.

Speed Devils

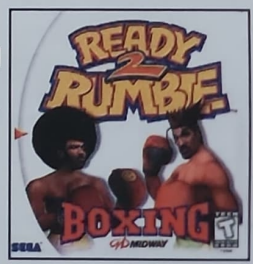
All Cars and Tracks: During gameplay press B, Right, B, Right, Up, B, Up.

Incoming



Cheat Menu: When you turn on the game, press START. When the main menu appears, press Up, Down, Left, Right, X, Up, Down, Left, Right, Y to reveal the cheat menu. Here you may choose your starting mission, infinite lives, infinite shields, etc.

Ready 2 Rumble Boxing



Alternate Costumes: Press X + Y from the character selection screen.

Marvel VS. Capcom

Fight as Orange Hulk: Highlight Chun-Li at the character selection screen. Then, press Right(2), Down(2), Left(2), Right(2), Down(2), Left(2), Up(4), Down(2), Right(2), Up(2), Down(4), Up(4), Left, Up. Orange Hulk will appear above Ryu.

savior's Top Ten

This month I figured I'd try something a little different. You can still e-mail or snail mail me your gaming questions, and I'll still answer them (sometimes), but I won't be publishing them in my column anymore. Instead, I'll be talking about the thing I love most in the whole wide world...playing games.

I'll be talking about the top ten games that are taking up all of my free time. I'll be giving you my opinion on those games, rubbing it in your face that I get to play every new title that comes out, as well as all of the imports. I'll brag about the fact that you have to beg Mom and Dad, pump gas or dig in between the couch cushions to scrounge up enough dough for your next game and I don't. At least you can use my list to help you pick which titles you should spend that hard-earned money on, though. I'll try to help you avoid those Psychic Force 2012s and steer you towards the Soul Caliburs.

This month only consists of a week's worth of gameplay. Check back next month when I'll comment on the entire previous month's library of games.

Seventh Cross: Evolution
Dreamcast
UFO Interactive

This game has taken up almost all of my free time over the last three days. It's a combination of puzzle, strategy, turn based battle and exploration, but it's also a lot more than just that.

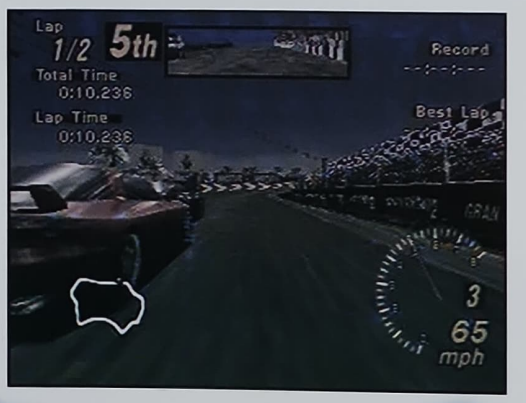
You start out the game by choosing colors to match things like strength, intelligence etc. The choices you make here decide your character's initial DNA makeup. Then, you give your character a name, and he or she is born. Not as a human child, however, but as an amoebae, floating in a lake. You then move your little amoebae around and suck up whatever particles you see floating in the water, avoiding confrontations with anything that has limbs and or is chasing you. If you can survive long enough to absorb several particles, you will evolve before your very eyes. Eventually you will consist of four major parts; head, body, arms and legs. Once you get to this point, you won't automatically evolve, but will rather have to create body parts manually.

This consists of finding an evolution tablet and using it to bring up a DNA chart. The chart is a 10x10 grid, into which you can place different colored tiles. When you're happy with your tile layout, you send it (where, I'm not sure). Depending on where the tiles were placed you will end up with a new part, either a head, body, arm or leg. The part will also vary in level, and have different strengths and weaknesses, such as a higher HP level, but a worse healing rate. Different legs will also allow you to bring your character out of the shallow lake and onto land, into the sea, etc. New arms will grant you new EXPowers, which are, more or less, magic spells, such as Heal or Fire.

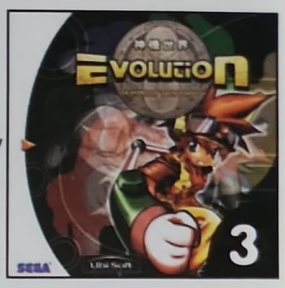
I could go on and on about this game, but I have to get back to playing it.

Gran Turismo 2
PlayStation
Polyphony Digital

GT2 plays almost exactly like the first one. I'm psyched about the new cars (especially the rally cars), as well as the amount of new cars. The new license tests present a new challenge too, which is pretty cool. I'm not sure, but I think the graphics were of a little higher quality in the first GT.



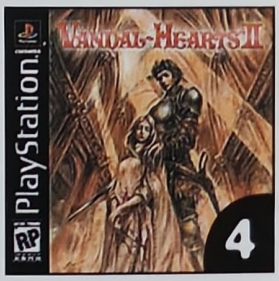
Evolution
Dreamcast
Ubi Soft



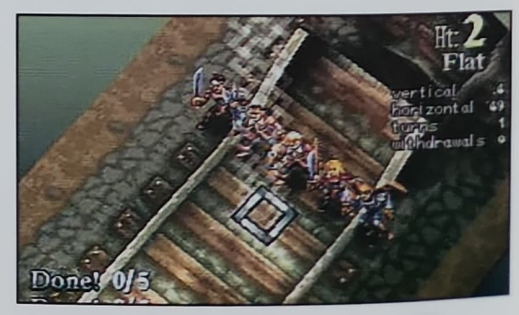
This is actually my second week playing the game, but my first week writing about it in this column. You can read my review of the game elsewhere on the site, or I can just tell you that I like the game. It's a solid RPG.

Nothing groundbreaking, but nothing disappointing. Well, the fact that there is no voice throughout the entire game is a little disappointing, but it doesn't ruin the game.

Vandal Hearts 2
PlayStation
Konami



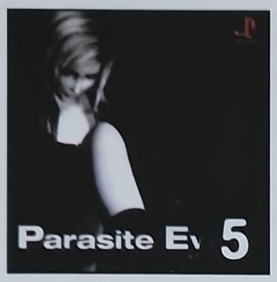
VH2 is your typical strategy game. While constructing a walkthrough for the game I realized one of it's drawbacks; it doesn't need a walkthrough. Maybe a small FAQ to help you find some elusive items, but all in all it's not a difficult game to play through. It's enjoyable, especially if you've been dying for a good strategy game ever since Final Fantasy Tactics.



www.gameshark.com

savior's Top Ten

Parasite Eve 2
PlayStation
(Japanese)
Squaresoft



I didn't get to spend a lot of time with this title, only because it's Japanese and not extremely enjoyable if you can't follow the story. I loved the first one, and it seems that 2 is more of the same, so you

shouldn't be disappointed if you liked the first, also. Controls are in the Resident Evil vein, which is different from the first (I'm fairly certain). It's two discs this time, by the way.

Koudelka
PlayStation
(Japanese)
SNK

This would be the first "gothic" RPG, as far as I know. Battles are fought more in a strategy game style than in a traditional RPG style. They're fought on a tiled battlefield. Each turn you are granted a move and an attack, a lot like Final Fantasy Tactics. The graphics are pretty impressive. A lot of the story has English voice overs.

Wipeout 3
PlayStation
Psygnosis

If you don't know, it's a futuristic racer. Pretty solid overall. Has a steep learning curve, but once you get the hang of the analog controls and good feel for the track layout it's very enjoyable. New weapons and shield deterioration setups are a nice change from the previous Wipeouts.

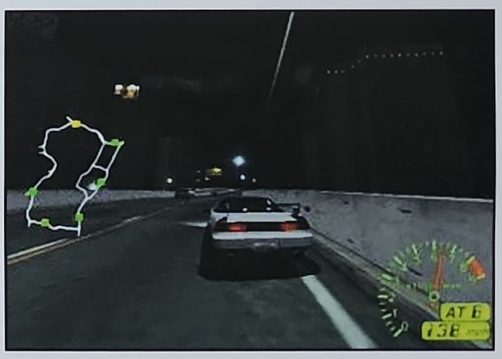
Vigilante 8:
Second Offense
Dreamcast
Activision

I'm not big on car combat, but this game looks and plays so good, I've spent a good amount of time behind the wheel of my garbage truck.

Come to think of it, refuse removal may be the career for me, forget this review writing business.

Tokyo Xtreme
Racer
Dreamcast
Crave
Entertainment

I had played this one to death when it first came out and beaten all of the regular game rivals (137 of them), but never bothered to go after the 4 Devils (the final 4 rivals in the game, only available after beating the regular game). I'm happy to say that I have taken down all 141 rivals in the game. I'm a little sad to say that there was nothing cool about the ending I got for doing so. Oh well, at least it unlocked a few cool cars, like the Porsche 911.



Rampart
GameBoy
Midway

Anyone who played this game in the arcade knows how addictive it is. Granted, it's not the same on the tiny screen and without the trackball, but it's still fun.

GameShark Gear

An In-Depth Look At New Devices From InterAct.

Dreamcast™ Basic Memory Card

You don't need Ginkoba to boost your memory, but you will need this basic memory card for Dreamcast (P-20-316E, SRP: $19.99). It has 200 blocks of storage capacity. That's more than enough to save your high levels, bone-breaking combos and high scores.

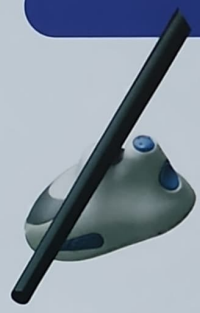
Nintendo® 64 SportsBall Blowout

Sports games. We all play them, and we all have to save them. These cards put all of your individual sports saves in one central location. Molded in the shape of popular sporting equipment, our Sports Memory Cards save your seasons, high scores, team rosters and whatever else you can punch and jump your way to! Get all four at one low price plus get a free Nintendo 64 console keychain, with an LCD display!

Dreamcast™ TremorPak™ Plus

One device does it all! This keen piece of technology is both a vibration feedback device as well as a memory card (P-20-317, SRP: $9.99). Plug it into your Dreamcast controller and experience the thrill of a 50-foot drop and, when you're done, save it to the built-in 200 block memory card.

PoolShark™



OK, all you PC pool hustlers-this one's for you! The Real Feel PoolShark allows you to play your favorite PC pool games with a real pool cue (I-73-950, SRP: $29.99). Just stoke the included mini-cue or you own stick over the stick control roller and watch the balls fly off the break. The PoolShark even doubles as a 3-button PC mouse. As a special bonus, receive a free PoolShark mouse pad only when you order through Dangerous Waters!

THE BIGWAVE

The Big Wave CD-ROM

Well, well, well looky here! It seems as though the proverbial cat's finally out of the bag. People around the world are excited with anticipation. Over what, you say? Well, word on the street has it that there's a new sheriff in town taking names and asking questions later... much later. Big Wave is the help we've all been waiting for! Exclusive codes, enhanced game saves, programmer's cheats and software upgrades are all included on this glorious little "GameShark/GameShark Pro/GameShark CDX" enhancement CD called Big Wave! The power we've all dreamed of having has finally made its way into our mailboxes, into our Playstations® and into our hearts!

Contained within said #2 CD ala Big Wave is more saves, more GameShark codes (which you can load directly into your GameShark), more programmers' cheats and more upgrading fun... yes fun, okay?! If you missed out and didn't subscribe for the year of Big Wave CDs, consider this your last chance. For all this love and affection, you only pay $16.00 and get not 1, not 2, not 3 - but 4 Big Wave CDs over the course of a year! That's a fine, fine deal!

Now that you want to subscribe, flip to the last page and fill out the form. Then mail the form and a check or money order to the given address. Next wait patiently for the CDs to arrive. Oh yeah, and...

ABUSE THE POWER!

"Big Wave CD-ROMs #1, #2 & #3 are not compatible with the GameShark CDX. If you have subscribed to Big Wave and own a GameShark CDX, InterAct will add one installment to your already paid subscription in order to compensate for this incompatibility. We are working day and night to correct this problem and rest assured, you will get what you deserve. InterAct would like to apologize for the delay and would like to thank all of you for your patience."

Working to keep you guys on top!

InterAct's GameShark upgrade policy has changed. We have an updated software version that's compatible with most N64 games available. If you own a N64 GameShark (SV-374), version 0.0 to 2.99, send in your GameShark along with $10 to receive a software update, or send $35 with your GameShark to upgrade to a GameShark PRO.

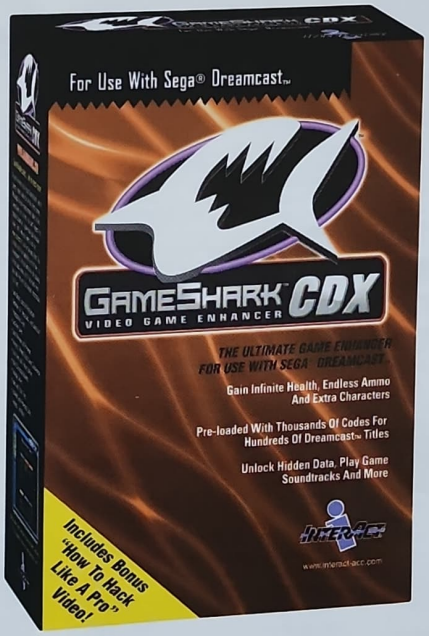
If you own a PSX GameShark (SV-1104), version 0.0 to 2.99, send in your GameShark along with $35 to upgrade to GameShark CDX.

If you own PSX GameShark version 2.0 or above: Subscribe to Big Wave and receive 4 upgrades per year, guaranteed. Plus receive any supplement CD's if a software update is needed.

And lastly, if you own Game Boy GameShark (SV-924), all versions, send in your GameShark along with $20 to upgrade to the GameShark Pro.

Dreaming of a World Without Boundaries

You didn't think we forgot about the Dreamcast™, did you? Well, whether you did or didn't, we didn't so you shouldn't have if you did, which we're not saying you did. The point here is that there will be a GameShark® CDX for Dreamcast in the very near future. Hell, maybe it's out as you read this! The only way to truly know is to pick up the phone and call your local videogame supplier.



For Use With Sega® Dreamcast™
GAMESHARK CDX
VIDEO GAME ENHANCER
THE ULTIMATE GAME ENHANCER FOR USE WITH SEGA DREAMCAST
Gain Infinite Health, Endless Ammo And Extra Characters
Pre-loaded With Thousands Of Codes For Hundreds Of Dreamcast™ Titles
Unlock Hidden Data, Play Game Soundtracks And More
Includes Bonus "How To Hack Like A Pro" Video!

More than likely, you're quite familiar with the GameShark's capabilities. GameShark CDX for Dreamcast carries on the noble tradition of all GameSharks before it. We'll still be pounding you with all the latest codes for all the hottest games. Our website, gameshark.com, will be overflowing with Dreamcast codes, upon the product's launch. Oh, and while your on gameshark.com, check out the multitude of new features we're cramming in there. Don't worry about getting on the computer, you can get to the site directly through the CDX... Oops, did I say that? Well, the Dreamcast has a modem and we've got a hot new site, so you make the connection and imagine the possibilities.

While we're in the paragraph directly following the statement about possibilities, let's think about some other InterAct-Dreamcast possibilities, shall we? The ink is still drying on a nifty little agreement between InterAct and Sega of America, Inc. Through this agreement, InterAct (us) will be bringing gamers (you) a multitude of licensed Dreamcast controllers and such. Licensed products have the official Sega stamp of approval and are guaranteed to be compatible with all present and future Dreamcast games. We're so excited! Are you excited? You should be.

900 CodeLine... Thingy
The word is out...1-900-773-7427

That's the number you'll need in order to gain access to the newest codes available for your PSX, DC and N64 GameShark. Updated weekly, you're sure to find just what you crave... CODES, CODES and more CODES! Write that number down, get it tattooed on your forehead or memorize it if ya think ya can! Forgetting that number would be a fate worse than death... okay so it wouldn't be that bad. But if gaming is your life, as it is ours, that number is your saving grace. Not only do you get to write down thousands, upon thousands of lines of code, but you get to listen to the ever-so-soothing voice of Andy, our resident code update guy/dude/refugee. Not only that, but you don't have to subject yourself to another second of unwarrented abuse from CodeBoy! 1-900-773-SHARK - learn it, love it, be gentle with it and most of all tell your friends about it! Sure, we have other sources for codes, but the GameShark codeline is for those with a hankerin' to cheat now... RIGHT NOW, THIS MINUTE!

Oh and BTW (that's By The Way for you non-IM-having folk), yes, we know SHARK is more digits than necessary... variety is the frickin' spice of life, right?

Game Boy Codes
Can It Be True? I say Yes

Now, for the first time ever, Dangerous Waters has included GameBoy GameShark Codes! I know, I know, we've excluded you folks for so long. Well, the wait is finally over! Check out the brand-spankin'-new GameBoy GameShark Codes in the code section of this issue. What, don't believe me? Well, here's just a taste... a tidbit, if you will, of what you can expect:

Spiderman X-Men Infinite Health 0120f8d1

Star Wars Episode 1 Racer
Always Place 1st 0100A0C2

Star Wars Yodas Story
Infinite Health 01408ad5

Motorcross Maniacs 2
Infinite Fuel 90404fca

Metroid 2 Return Of Samus
Invincibility 018784d0

Vigilante 8 Infinite Health 01ffaddf

Yeah, we know we're the shiz'nit. The fact is, you've been left out in the cold for so long, we couldn't resist helping. Thank you letters, pictures of domesticated animals and money can be sent to:

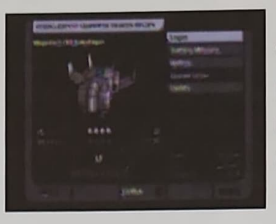
GAME PREVIEW

COLONY WARS: RED SUN



The epic Sci-fi saga continues in Colony Wars: Red Sun, but for the first time you have the ability to control your own destiny. Instead of siding with the Navy or the League, you play a ruthless mercenary, out for no one but yourself. Colony Wars: Red Sun's revised mission structure will enhance the game's depth and depending upon which missions you select, you may find yourself helping the Navy or the League, whether you like it or not!

Colony Wars: Red Sun pushes the PlayStation to its limits, refining and enhancing the graphics to improve the in-game textures. Get ready for a truly cinematic experience with more quality FMV and a completely new dramatic musical score performed by a professional orchestra. CW: Red Sun features a comprehensive selection of customizations and upgrades. Ships will be more upgradeable than before and there will be a greater choice of weapons, a wider range of unique enemies, and a fully interactive space environment. Prepare to navigate your course across war-torn star systems towards your destiny, in what promises to be the most epic battle yet!

Features:

- 50 multiple-objective missions leading to 2 cataclysmic endings – victory or annihilation!
- 8 ships with fully upgradeable weapons and options
- 5 hubs each with animated end-of-hub guardians
- 32 weapons
- 6 planet-based missions
- 5 solar systems (3 new, 2 from Colony Wars: Vengeance)
- 28 FMV sequences
- Smoother learning curve with introductory missions and tutorials on complex features
- Epic, cinematic quality with increased emphasis on personal involvement
- Gripping linear storyline married to new freeform game structure
- Strong graphics reflect the player's progress from the frontiers of human space into the heart of interstellar war
- New soundtrack recorded by a specially formed professional orchestra
- New special effects including interactive nebulae, gas-giant atmospheres, "hard" lighting
- Improved "dogfight" AI for enemy fighters
- Further optimized game engine with improved texturing
